

THE CITY OF HAWARDEN

The City of Hawarden sits in the western portion of Sioux County at the intersection of Highway 10 and Highway 12 in the northwest corner of the state. The City was looking to renovate the Hawarden City Hall, Fire Station and Auditorium, a two-story building that was placed on the National Register of Historic Places in 2006. The City would like to restore the building to its original historic state to establish a museum of local artifacts and host community events.

The City used the funds to inspect for asbestos, abate any asbestos found, and complete a Phase I environmental site assessment. Renovation activities at the site began in February and the tasks detailed above were completed in early June of 2012.
